

sgfleet Logbook

Eliminate paper logbooks!

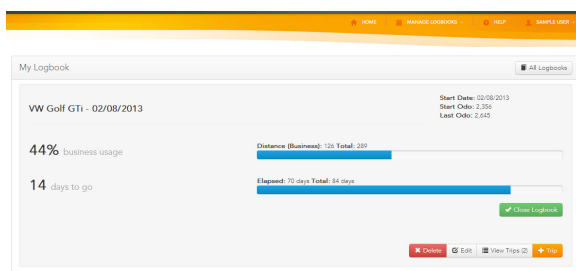

The **sgfleet** Logbook is an online tool that simplifies record keeping requirements of vehicles used for business purposes.

This system has been designed to capture business trips and their purpose via a simple online portal.

The data from the completed log can be downloaded and sent directly to an employer or tax agent for record keeping and compliance purposes.

To manage trip data more effectively or use the Operating Cost Method for calculating FBT, the **sgfleet** Logbook is a no cost, user-friendly solution.

The **sgfleet** Logbook is available to anyone with internet access and is supported by most computing devices including personal computers, smartphones and tablets.

The **sgfleet** Logbook

- ✓ Captures trip dates, odometer readings, kilometres travelled and trip purposes in line with ATO requirements
- ✓ Allows continual monitoring of business kms throughout the year
- ✓ Will eliminate the need for keeping paper based logbooks
- ✓ Allows the user to measure a continuous 12 week period of data
- ✓ Ability to log private trips (optional)
- ✓ Allows for multiple logbooks to be completed during the year should circumstances change such as a variation of business use
- ✓ Offers an exportable data summary or a PDF version including a signing section (with employer name)
- ✓ Tracks business use percentage and the days remaining until the continuous 12 week period is complete
- ✓ Convenient to use so better records can be maintained which may ultimately help to maximise tax benefits and savings

Intelligent fleet management
